Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-11 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Haas et al U.S. Patent 4,137,566 or Nestbit et al U.S. Patent 5,772,522.

Both Haas et al and Nesbit et al clearly teach a golf swing diagnosis system using a plurality of cameras, sensors on various positions on a golfer as well as on a golf club, recognizing means for recognizing at least two reference points which are specified in colors (Hass, col. 2, lines 40-44) (Nestbit et al, see abstract). Various means for converting the swing motion into still images and computing the evaluation items, and diagnosing means for diagnosing the golfer's swing by comparing to a model swing stored in the computer.
